You will be embedded with our smart and experienced experts and will learn from the best. We need people who are passionate about technology and want to learn how to build quality software the right way.

We are at the forefront of what we do and are working on ground-breaking projects. This means innovation, automating manual tasks, in others it's exploiting technology such as LIDAR to harvest 3D Geospatial data. Projects are varied and they give us our competitive edge.

Key Accountability & Responsibilities

- Hands on development, ensuring completeness against Acceptance Criteria
- Thorough methodical approach to development
- Unit test as appropriate
- Ensure quality and timeliness of team documentation
- Adherence and contribution to house standards
- Database design and implementation

Gigaclear appreciate the value of Agile development frameworks and you will work in this environment from day one.

Knowledge & Skills

- Coding knowledge – we use Python, C++, C#, Java
- Knowledge of SQL

To be successful you will:

- Passionate about building quality software
- Willingness and capability to learn and develop

Qualifications & Accreditations

- Degree level of education in a Computing / IT / Networks discipline

Our Values

- We are effective and passionate in what we do
- We are speedy and responsive to colleagues and customers
- We are clear and open with all
- We deliver a transformational experience
- We are in a shared endeavour and will succeed together

This job description is not intended to be exhaustive. The post holder will be expected to adopt a flexible attitude to the duties which may be varied (after discussion), subject to the needs of the business and in keeping with the general profile of the role.
